Abstract
As the demographics of U.S. schools are changing, educators have to embrace this change and prepare students to adopt diversity and inclusivity as a means to increase students’ understanding of their peers. Not only are race and ethnicity identities at the forefront of these changes, gender identity and ability identity must also be supported, as more students are challenging traditional gender roles and as more students are mainstreamed into regular education classes. This article seeks to address usage of interactive read alouds of multicultural literature as a means to help bridge students who need inclusive and equitable pedagogical practices in race, gender, and ability identity and those who need to understand those who identify as one or more of the aforementioned. A recommended list of multicultural literature is included with discussion starters to assist educators in establishing critical conversations with students who identify as one of the listed identities or for those students who need to understand those students who identify differently than them.

Keywords: multicultural children’s literature, racial identity, gender identity, ability identity, read alouds

Background of the Problem
In the early 2000’s, the United States entered an era characterized by the influx of immigrants and a vast increase in the number of U.S. born ethnic minorities (Banks, 2001, NCES, 2014). That era continues; for example, from fall 2011 the number of White students enrolled in prekindergarten through 12th grade in the U.S. public schools decreased. The number of Latino students enrolled during this same time period, however, increased (NCES, 2014). Most recently, there has been an increase of students of color in public school classrooms. In fact, the United States Department of Commerce (2000) projected that African American, Asian American, and Latino students will comprise nearly 57% of all students across the nation by the year 2050. Thus, there is a critical need for future educators to embrace the reality that they will be working with students whose backgrounds will, more often than not, be unlike their own; teacher educators need to be prepared and know how to prepare their students to embrace this reality, as well (Clayton, 2011; Hughes, Gleason, & Zhang, 2005; Nieto & Bode, 2012; Wilson & Rodkin, 2011). Within the ever-changing context of the sociopoliti-
Little attention has focused on how book subject matter may influence teacher reading and student reading response. Furthermore, research shows that in the educational space limited opportunity exists for students to have open-ended conversation around literature (Worthy, Chamberlain, Peterson, Sharp, & Shih, 2012).

In a recent study which explored teachers’ comfort level with discussions of a variety of social topics with children, it was found that the topics of marriage equality and gender identity elicited the most discomfort. Teachers identified these two topics as areas they would not discuss with students in their classroom (Piper, Walker, Pittman, 2017). Religion, family composition, incarceration and politics were also areas of concern for teachers as they identified these topics as topics that they would discuss but would experience discomfort when doing so. The topics that teachers felt they could openly discuss included disabilities, poverty, and aging. Teachers may feel challenged by the sociopolitical contexts of some read aloud experiences. Teachers need to be confident and comfortable to discuss social issues and hot topics with their students with a sense of fearlessness. Confidence and comfort is vital to their ability to discuss social issues and hot topics with their students. Both educators of pre-service teachers, and those who work with teachers, can be better prepared to support teachers in these new frames of discussion.

Purpose of Interactive Read Aloud

Reading aloud to students is a practice that is consistently recommended for elementary teachers in order to encourage students’ engagement with and motivation to read text (Dugan, 1997; Sipe, 2000, 2002). Researchers have examined how teachers use “read-alouds” in the classroom (Fisher, Flood, Lapp, & Frey, 2004) and the teacher practices used to analyze how students respond to the books that are read aloud (to them by teachers and/or peers and/or that they read aloud themselves) (Sipe, 2000, 2002).
This work seeks to explore multicultural children’s literature across three areas: racial identity, gender identity, and ability identity. Included are books that address each area and detailed sample questions that teachers can use to prompt student discussion during read alouds in the elementary-aged classroom.

**Racial Identity.** Media outlets can impact the ways that society and particularly children see race today. Topics such as immigration, police brutality, poverty, and race are often at the forefront of social discussions. In response, the selection of children’s literature around similar topics is increasing. The following texts can be used to introduce the topic of race to children, *The Other Side* (Woodson, 2001), *Pink and Say* (Polacco, 1994), *Tea and Milk* (Say, 2009), and *Separate is Never Equal* (Tonatiuh, 2014). While reading, texts like these provide opportunities for the reader to make meaning of the story and situate the social contexts. Table 1 provides publication details and a brief summary of these recommended texts.

**Gender Identity.** Gender identity is a topic that is relevant in schools today. Gay, lesbian, bisexual, and transgender (GLBT) youth are declaring their identity at younger ages, and the average coming out age is sixteen (Herdt & Boxer, 1996, as cited in Human Rights Watch, 2001). Because of varying definitions around gender identity and sexual identity, the exact number of school-aged children who identify as GLBT in the United States may be difficult to determine. Because schools are designated safe spaces for children, teachers can support students’ true identity with texts that explore discussions about...
gender identity. Texts that are appropriate for forming critical conversations centered around gender identity are represented in Table 2.

**Ability Identity.** As classrooms continue to grow, teachers are charged with meeting the varying needs of individual students. Often the social development determines how a child will participate in school and in society. Inclusion of all children is essential to the development of each individual child. The Individuals with Disabilities Education Improvement Act (IDEA, 2004) was created to ensure that all students have an equitable education. Today schools include children who have a physical or educational disability, and many of these students are mainstreamed into the general education classrooms with the support of special education teachers and assistants. Teaching children the importance of acceptance is an important part of their own identity development. There are many texts available that explore students’ ability identity. Some suggested texts are outlined in Table 3 provide insight about various ability identity topics ranging from visual impairment to autism.

**Discussion of Implementation of Multicultural Children’s Literature**

While a majority of educators agree that frequent teacher read alouds are important (Anderson, Hieber, Scott, & Wilkinson, 1985; Snow, Burns, & Griffin, 1998), they have difficulty implementing them when they are tasked with a standards-based approach to teaching especially when school districts promote a pre-packaged scripted curriculum with limited flexibility to add multicultural children’s texts. Additionally, studies on teacher read alouds (Bintz, 1993; Elley, 1992; Ouellette, Dagostino, & Carifio, 1999) have been conducted but the lack of discussion around the process that effective teachers use to implement read alouds to enhance student learning on multicultural topics is lacking. What is evident is that research suggests there are limited opportunities for students to have open-ended conversations around literature in PK-12 classrooms (Worthy, Chamberlain, Peterson, Sharp, & Shih, 2012). Bohm (1996) argues that in order to create such spaces, teachers need to assume more of a facilitator role in the classroom, and even act as a participant in the discussion of texts. This is a vital teacher role when the topics around identity development are addressed.

A key element to interactive read alouds is the opportunity that teachers have to introduce students to literature they may not have had the opportunity to view otherwise (Hedrick & Pearish, 2003; Morrow, 2003). Research demonstrates the benefits of read aloud activities especially in terms of motivating students to read and in develop their reading prowess (Fisher, Flood, Lapp, & Frey, 2004; Morrow, 2003; Palmer, Codling, & Gambrell, 1994). Overall, the research emphasizes the importance of selecting texts that increase student engagement with, and the understanding of, literary features such as character identification, story setting, and text connections. These outcomes are most durably achieved when students undertake learning through analytically challenging conversation about literature (Dungan, 1997; Sipe 2000; 2002). Multicultural texts related to developing identities help students gain connection to literature whereby children are able to understand their own developing social identities while increasing their literacy knowledge.
Conclusion

Classrooms across the United States are changing. Children are becoming more aware of different issues facing society that, in fact, have the potential to influence their identity development. Now, more than ever, it is essential that teachers consider how their approach to discussing these topics may influence a child’s social development and their understanding of identity. The literature provided is authentic and can be used by teacher candidates, teachers, and teacher educators to begin to have the critical conversations that impact students and teachers alike. Implementing such literature has the power to increase awareness of issues and impact societal change.

| **The Other Side**                 | Jacqueline Woodson, 2001 | A familiar story of a friendship between Clover and Annie, two girls who live on opposite sides of a fence. Clover, a young African-American female and Annie, a young white female see each other often but have been told not to go to the other side. As summer passes, the two girls introduce themselves and the unfamiliar becomes familiar. This story shows the power of young children. | Have your parents ever told you not to go somewhere? Explain.  
Have your parents ever told you that you could not be friends with someone? Explain.  
How did you meet your friends?                                                                                      |
| **Pink and Say**                   | Patricia Polacco, 1994 | This is a story of interracial friendship during the Civil War between two 15-year old soldiers. Say, a young White and poor soldier tells the story of how he was rescued by Pinkus as he was wounded. The boys eventually are torn apart again. | Have you ever been friends with someone from a different race?  
Other than your family, have you ever helped someone when they were hurt? Why did you choose to help?                                                                                                                                  |
| **Tea and Milk**                   | Allen Say, 2009 | Recounting the story of May, who after graduating from High School in California is forced to move with her parents to their native Japan. May becomes rebellious and misses her native country. Her parents make her repeat high school to learn “her own language” and the students begin to tease her. May overcomes these challenges and focuses on exploring just who she is. | Have you ever been teased for talking differently? Explain.  
How would you feel if you had to repeat a grade to learn a language?                                                                                                               |
| **Separate is Never Equal: Sylvia Mendez & Her Family’s Fight for Desegregation** | Duncan Tonatiuh, 2014 | In 1944, third grader Sylvia Mendez tried to enter school in California. However, her family was repeatedly told, “Your children have to go to the Mexican School.” Unhappy with the comments from the school, Mendez’s parents formed an association and fought against the injustice. | What does injustice mean?  
Should all students be allowed to go to the same school? Explain.  
Have you ever stood up for something in which you believed? Explain.                                                                                                                |
| **The Name Jar**                   | Yangsook Choi, | A young Korean girl, Unhei, moved to an American school. In her new school, she felt that she needed to change her name to fit the identity of U.S. students. Unhei’s classmates put names in a jar for her to try. Unhei tried many American names. Unhei didn’t realize how special her name was until a classmate visited her neighborhood. Unhei decided to keep her name as an important cultural identity. | How did you receive your name?  
What does your name mean?  
Would you change your name if you had to move to a new country? Why or Why not? Explain.                                                                                           |
