AFA Visits . . .

the aviaries of
Mac & Cindy Sharpe

by Jerry Jennings
Fallbrook, California

In the foreground, a large, well planted free flight aviary was once a swimming pool. Mixed species now enjoy the big flight area. The background building is the Sharpe's 85-foot long roofed aviary with many large flights extending out from it.

A pair of elegant Demoiselle Cranes are just tall enough to check out the next door neighbors.

Interior view of the service aisle of the 85-foot roofed aviary.
The perfect location for an aviary would be as far away as possible from your neighbors, maybe three quarters of a mile away. Surround yourself with 3,500 acres of abandoned phosphate mines, 1,600 acres of county parkland and you can do what you want. Such are the surroundings of Cindy and Mac Sharpe, whose 40 acre citrus grove with home and aviaries 20 miles east of Tampa, provide them with all anyone could ask for. Just think! Your job, your hobbies, and your getaway all without any commute whatsoever!

In 1958 at the age of five, Mac encountered his first bird, a Bantam chicken. It wasn’t long before he knew he wanted to be a farmer, and was soon an active member of 4-H and Future Farmers of America (FFA). By the age of nine, Mac was working for the J.C. Smith Gamebird Farm. There, Mac learned how to manage ornamental pheasants and began to acquire his own. He also became interested in the strange family of Megapodes, whose eggs are incubated in a mound of decaying vegetable matter, attended by the male bird, who tests the mound temperature at regular intervals, adding or removing material to maintain proper temperature.

Mac’s collection grew until he went off to the University of Florida, where other interests got in the way. The collection was dispersed and he was out of birds until his senior year, when he obtained a pet Screech Owl. After graduation in 1977, he moved to Brandon, Florida, where he began raising ornamental chickens. By 1981, he was raising ornamental pheasants, Java Green Peafowl and Jungle Fowl. That same year he met Lyn Ash, the artist at Busch Gardens, and Rodney Michael, a Java Green Peafowl breeder, both of whom inspired him to become more involved in bird breeding. By the mid-1980s, he was also working with cranes.

In 1987, while visiting Busch Gardens to trade some pheasants, he noticed the beautiful variety of touracos, and was moved to acquire some, and thus began his love affair with softbills. His first touracos were purchased from Joe Longo, who had one of the best collections of touracos in the U.S., and who had developed very successful techniques for their captive breeding. Shortly thereafter, Mac met Richard Schmidt, who also lives near Tampa, and they fueled each other’s interest into an addiction.

Mac’s first aviaries were a couple of chainlink pens 8’ x 12’ with attached prefab sheds of wood 10’ x 16’ for shelters. He kept his pheasants and peafowl in these. As time went on, he built more and more pens, until he now has over an acre completely under wire.

One of the more curious pens is an enclosed swimming pool. It seems that Mac’s first wife, whom he divorced in 1983, liked to swim. Against his better judgement, he borrowed the money to build a pool he didn’t really want. When she left, he was faced with a useless reminder of her that he had to continually make payments on. So, he converted it into an aviary by constructing a Quonset hut-shaped framework above it and over which he stretched wire. The pool itself was filled halfway up with soil and planted. It contains a number of softbill species including Grey Wing Trumpeters, Coletta Mynahs, Indian Rollers, Abdim Storks, Fairy Bluebirds, and White Breasted Waterhens. It is the only aviary known in the U.S. to have its own custom, one meter diving board.
In 1990, Mac built a new building 24' x 85' long under roof, with a number of large flights extending out from it. These range in width either four or eight feet and in length from 12 to 32 feet. There are a variety of assorted other pens varying from 12 feet by 20 feet up to 30 feet, all of which house softbills, pheasants, and cranes — 80 different species altogether!

The softbills are fed a diet of fruit cocktail (canned) which is rinsed, canned mixed vegetables (rinsed), and a variety of fresh vegetables. Some of the birds, such as the corvids, get WalMart's Old Roy dog kibble (named after Sam Walton's hunting dog) along with Purina Nutra Blend Gold Pigeon pellets, mealworms, crickets and occasional pinky mice, especially when young are present in the nest and when they are handfeeding. Twice a week, the diets are supplemented with Vionate vitamins and Spirulina Algae Feast.

The gamebirds receive a diet of the Nutra Gold Pigeon pellets, Purina Game Bird crumbles, and Vionate twice weekly.

Most of the softbills in the collection are unusual in that they are not often seen outside of zoos. Mac and Cindy have had good fortune in breeding them. Many are incubator hatched and handfed from day one. They have accomplished this with several species of touracos, Collie's Magpie Jay and recently with the rare Pied Crow. Though difficult to come by, the Pied Crows laid eggs within two weeks of their arrival in spring 1992, and the Sharpes were rearing them a couple weeks later.

A number of rare parrots also have been handreared on the farm. Next year they hope to rear the very rare Golden-mantled Racket-tailed Parrot, which they recently imported from Indonesia in partnership with Richard Schmidt. These are the only Raquet-tailed Parrots known to be in captivity in North America.

Among the rare gamebirds in the collection are a variety of cranes, jungle fowl, pheasants and Guineas. They produced 20 Ceylonese Jungle Fowl in 1992, yet there are probably no more than 20 producing pairs in the entire U.S. They are having good luck with the rare Vulturine Guineas as well, and eggs were hatching in the incubator during our interview.

The collection is cared for on a daily basis by Mac and his wife, Cindy. While he oftentimes gets most of the credit, he says, "she does most of the work." The work is made somewhat easier by the neat watering system in use. It consists of a con-
PET FAIR
Family Fun Day... Children FREE

* Birds * Cats * Dogs * Fish * Reptiles * Turtles
* Small Animals * Horses ..... all on exhibit!!

* Product Exhibits
* Educational Seminars
* Meet the Experts
* Caged Bird Show
* CFA Cat Show

* Over 100 Breeds of Dogs
* Pot-bellied Pig Show
* Llama Show, & More

NEW! "Bear Essentials" Craft & Gift Show (One of So. Cal's favorite craft shows)

Plus... Pony Rides and the Great American Petting Zoo

Services & Products for Sale

Tickets Available at Box Office or Ticketmaster

Promoting Responsible Pet Ownership Through Education

April 23-25, 1993
at the FAIRPLEX
Los Angeles County Fairgrounds
Pomona, California

SHOW HOURS
Friday - Noon to 8 p.m.
Saturday - 10 a.m. to 9 p.m.
Sunday - 10 a.m. to 5 p.m.
SUN SEED SUNSCRIPTION™ SUN·STIX™...PLUS

SUN SEED SUNSCRIPTION™ SUN·STIX™ are vitamin-enriched, delicious treats for birds and small animals. They are a special formulation of the finest, flavorful, natural ingredients. SUN·STIX™ brand new “SUNSATIONALLY SEALED™” packaging features a unique design with a specially engineered foil liner that guarantees locked-in freshness. The large SUN·STIX™ has the exclusive rawhide center which provides hours of safe playtime fun. SUN·STIX™ are available in single-pack and value four-pack packages. Plus, your pets will also love SUN CAKES™, SUN SEED BELLS and SUN SEED PINE CONE treats. All are “SUNSATIONALLY SEALED™,” SUN SEED SUN·STIX™...

...your pets will love ’em. Try ’em. They are truly “SUNSATIONAL™”.

SUN SEED GUARANTEE
If you’re not totally satisfied with a SUN SEED product, simply return the unused portion for replacement, substitution or a full refund.
