1st place winner, Derek Cowie, Cerritos, CA
Red-tailed black cockatoo 3 days old.

As it has at most past AFA conventions, the Watchbird Photo Contest again graced the commercial booth area with an array of unique photos that caught every passing eye. The Washington, D.C. photo contest committee did a fine job displaying the many color prints—by far the largest group of entries.

On Friday, August 6th, a panel of five judges, M. Jean Hessler, Dale R. Thompson, Robert Berry, Helen Willet, and Joe McLaughlin, spent several hours deliberating over nearly 100 entrees (slides and prints) before the winners were chosen.

This year's winners are listed below. Congratulations to you—you of infinite patience, artistic eye, and a sense of timing!

All winners are listed below, but only the winners of the color print category are shown in this issue. Not all photos are shown in color here, but all color photos will be shown in color in future Watchbird issues. Next issue of Watchbird will feature the winners of the color slide category.
